Miami Rain and Heat Backup Planner

Protect the day when the forecast, heat, or energy stops cooperating.

USE THIS WHEN

The original plan only works if Florida behaves perfectly, which is not a serious operating assumption.

LIVE GUIDE

easily.miami/rainy-day-and-too-hot-miami-backup-plans/

Use the live page for current details, narrower choices, and the exact version of the plan before you go.

Miami Rain and Heat Backup Planner

Use the row that sounds most like the day in front of you. The goal is not maximum coverage. It is a cleaner first decision.

CHOICE	USE IT WHEN...
Shorten first	Cut duration before adding more driving or a rescue itinerary.
Move indoors nearby	Keep the same zone and use food, culture, or browsing as relief.
Use a shaded district	Choose a place with shorter outdoor transitions and easier regrouping.

ONE RULE THAT SAVES THE PLAN

Rescue the day, not the original vision.

Before You Go

CHECK THESE FIRST

- ☐ Check radar and heat before leaving.
- ☐ Choose the first thing that gets cut.
- ☐ Keep the backup in the same general zone.
- ☐ Know where shade, seating, food, or indoor relief exists.
- ☐ Set a point where the day becomes officially smaller.

IF THE DAY SHIFTS

If the forecast keeps changing, choose one weather-tolerant anchor and call that the day.

FAST EXIT CUE

If the optional part starts to feel like obligation, cut it before relocating the whole outing.

WRITE THE PLAN

Original anchor: _____

First thing we cut: _____

Weather-safe backup: _____
